

Flexi[®] 22

Flexi 22 offers new and improved features to enhance your sign and print production. Plus, Flexi 22 includes the new SAI Connect, user dashboard that puts important information at your fingertips.

SAI CONNECT - This new dashboard makes it easier-than-ever to manage all your SAI software licenses and subscriptions, download the latest versions and updates, access SAI's useful tools and how-to information, and see useful statistics about your print production.

WORKFLOW EFFICIENCIES – Flexi 22 is a production powerhouse providing both time and media saving features that will drive up profits for your business.

Its streamlined workflow enables more job tasks to be done directly in Production Manager. Job set-ups and changes can be done faster and easier.

One of the most exciting new features is 'Order Reprints', which creates and stores print orders in Production Manager -- with original job files and settings -- so you can quickly retrieve them to be printed again.

Whether adding contour cut lines, nesting or tiling jobs, working with transparencies or printing layers with white ink, you'll find benefits using Flexi 22.

And Flexi 22 is built on a Unicode system so Flexi's language settings can be customized separately from your computer operating system, a plus for multilingual operations.

DTF|DTG FEATURES – Direct-to-Film and Direct-to-Garment printing is one of the fastest-growing segments in our industry. Flexi 22 brings new features to simplify DTF|DTG design and production.

All DTF|DTG tools are conveniently organized under one tab, so you won't waste time scrolling through menu bars to find what you need. Transparency mask options let you easily print white under flood including for transparent TIFF and PNG files.

WORLD-CLASS SUPPORT, WORLDWIDE – At SAI we care about our customers, your satisfaction is our top priority. Our team of customer service and technical specialists, located in offices around the world, work to provide timely answers and solutions to your questions. We believe that support is a key component of high-quality software and something that distinguishes SAI in the marketplace. SAI provides support at no additional cost to customers using the current software version and all software subscribers.
