

SAFETY STRAIGHT EDGE

Safe by design straight edge

KEENCUT
THE WORLD'S FINEST CUTTING MACHINES

Designed to offer cutting accuracy and protection to the operator when marking, scoring or cutting

- Safety features to protect both the operator and materials
- Lightweight but robust design
- Manufactured and finished with premium quality materials
- Guaranteed for 5 years
- Available as imperial or metric scale
- 9 sizes from 45cm to 180cm

Safety by design

Protect the operator

Designed with the safety of the operator in mind, each straight edge comes with a full length integral finger guard. When applying pressure to the base of the straight edge operator's fingers lay flat and are protected by the curved integrated finger guard.

Protect your equipment

Cutting along a metal edge can take its toll on both the cutting edge and the cutting tool.

In order to provide years of uncompromised service each straight edge is fitted with an embedded stainless steel edge to resist wear.

Protect your work

Fitted with two full-length grip cords the straight edge is designed to grip work without damaging sensitive printed surfaces.

DIMENSIONS

Full length scale

Easy to read non-reflective surface with black text on a white background
For maximum accuracy each size is supplied with a full length scale
Available as imperial or metric in nine sizes
