

EPSON®

SureColor S8170

Our fastest 64" solvent printer

6-Color Ink Set

Innovation

1 Mix and Match Ink Sizes and Hot Swap Function

Customers can pick between 800mL or 1.5L ink packs² per color depending on preference

2 Color Consistency

Ink temperature sensor placed directly by the nozzle plate to closely monitor and adjust ink temperature

3 Faster Initialization

No need for cleaning cartridges/packs during printer initialization vs. previous generation

4 Nozzle Verification Technology

Automatically detect nozzle condition and adjust if necessary to keep print quality intact

PrecisionCore Print Head Technology

Advanced Micro TFP Print Head

- **Purpose-built** to work seamlessly with Epson UltraChrome GS3 ink - unlike other competitors who combine 3rd party inks and print heads.
- **Nozzle Verification Technology (NVT)** monitors nozzle health for irregular nozzles and automatically verifies and cleans nozzles without using media.
- **Ink Temperature Sensor** has been placed directly above the nozzle plate vs. prior generation print heads, leading to more consistent print quality and color.
- **Variable ink droplet size** reduces banding, minimizes graininess, and allows high-quality solid color printing.

UltraChrome GS3 Ink

Proven Ink Technology

- Latest generation solvent ink technology from Epson
- GreenGuard Gold Certification - full room designation

6 Color Ink Set

- UltraChrome GS3 ink, which is known for its outstanding gloss level and vibrance.
- Delivers a wide color gamut

Print. Finish. Ship.

Same Day Lamination

- First solvent ink technology to offer same-day lamination
- Increased production times
- High image quality with fast turnaround times

Ink Supply System

- **New ink supply system** where customers can pick between 800mL or 1.5L ink packs² per color
- Up to 3L of ink per color reduces frequency of ink replacements and maximizes productivity
- 6 color ink set, including Light Cyan and Light Magenta, helps minimized banding
- Hot swap function automatically switches ink packs, allowing long print runs without interruption

² Part of the ink from the first cartridges/packs is used for initializing the printer. Ink usage will vary considerably based on images printed, print settings, paper type, frequency of use, temperature and humidity. Variance may be more pronounced when printing infrequently or predominantly with one ink color. Ink is used for printing and printer maintenance, and all colors must be available for printing. For print quality, a variable amount of ink remains after the "replace ink" indicator comes on.
